Dimmer compatibility testing performed using 120V/60Hz supply.

Variations in supply power may require adjustments to recommended trim settings and/or affect dimming performance.

The design, specification, or performance of compatible dimmers is subject to change without notice.

*Maximum of four (4) drivers per output with Lutron LQSE-4A-120-D.

For questions regarding the compatibility of dimmer models not listed above, please contact Number Eight Lighting customer service at (707) 794-0888.

Dimmer compatibility testing performed using 120V/60Hz supply.
Variations in supply power may require adjustments to recommended trim settings and/or affect dimming performance.
The design, specification, or performance of compatible dimmers is subject to change without notice.
0-10V dimming options are configured for linear control.
For questions regarding the compatibility of dimmer models not listed above, please contact Number Eight Lighting customer service at (707) 794-0888.

Dimmer compatibility testing performed using 120V/60Hz supply.
Variations in supply power may require adjustments to recommended trim settings and/or affect dimming performance.
The design, specification, or performance of compatible dimmers is subject to change without notice.
*To minimize asynchronous behavior with Lutron LQSE-1DAL2-D module, limit the number of zones per DALI bus to a maximum of eight (8) per room.
DALI dimming options are configured for logarithmic control.
For questions regarding the compatibility of dimmer models not listed above, please contact Number Eight Lighting customer service at (707) 794-0888.
